

AKPOGA DICKSON OJAMA

SOC Analyst | Cybersecurity Professional

Almada, Portugal | (+351) 928 211 896 | ojamadickson@gmail.com
linkedin.com/in/ojama-d-28a13814a | github.com/ojamadickson-creator/SOC-Analyst-Portfolio

SOC Analyst with hands-on experience in threat detection, incident response, and log analysis. CompTIA Security+, Network+, A+, and CSIS certified. Completed a full incident response investigation analyzing **2,500 security events** across firewall, IDS, and VPN logs to reconstruct a 37-day network breach. Preparing for CompTIA CySA+. Based in Almada, Portugal. Fluent in English and Portuguese.

CERTIFICATIONS

- CompTIA Security+ | 2023–2029
- CompTIA Network+ | 2023–2029
- CompTIA A+ | 2023–2029
- CompTIA CSIS | 2023–2029
- CompTIA CySA+ | In Preparation
- IBM Cybersecurity Fundamentals | 2022
- Junior Pentester (TryHackMe)
- QA Manual Testing — Agile & JIRA (Udemy)

TECHNICAL SKILLS

- SOC & Detection:**Splunk SPL, SIEM correlation, log analysis, MITRE ATT&CK mapping, incident triage, IOC documentation, phishing investigation, malware sandboxing (ANY.RUN), VirusTotal
- Network Security:**Wireshark, Nmap, IDS/IPS, firewall policy analysis, Active Directory, SCCM, MS Intune/Autopilot, SPF/DKIM/DMARC
- Frameworks:**MITRE ATT&CK, NIST SP 800-53, NIST SP 800-61, Unified Kill Chain, Pyramid of Pain, GDPR, ISO 27001
- Infrastructure:**Windows, macOS, Linux (Bash), ServiceNow, JIRA, Google Workspace, Python

PROJECTS

Network Perimeter Breach Investigation — SOC Level 1 Case Study

TryHackMe, 2026

Personal Portfolio Project | [github.com/ojamadickson-creator/SOC-Analyst-Portfolio](#)

Investigated a simulated 37-day network intrusion at a financial services firm using firewall logs, IDS alerts, and VPN authentication records.

- Analyzed **2,485 security events** with Linux CLI (grep, awk, cut, sort, uniq) and Splunk SPL to extract attack patterns and correlate across log sources.
- Identified **port 4444 (Metasploit)** as primary attack vector: 127 hits, 87 allowed by firewall. Traced exploit traffic to August 25 — the day of the initial perimeter breach.
- Discovered **VPN brute force** on `svc_backup`: 118 failed logins in 19 minutes, successful at 02:19 on Sep 3. Attacker assigned IP `10.8.0.23`.
- Mapped **lateral movement**: 10.8.0.23 scanned 3 internal hosts (finance server, web app, workstation) on ports 22, 445, 3389 over 15 hours. Firewall allowed ~67%.
- Detected **C2 beaconing**: 80 beacons from compromised workstation to `198.51.100.77:4444` every 6 hours for 20 days. IDS flagged all as Priority 1.
- Uncovered **data exfiltration**: 60 HTTP POST large upload events from APP-WEB-01 to attacker IP on ports 80/8080.
- Built **5 Splunk detection rules** (SPL) for C2 beaconing, exfiltration, VPN brute force, lateral movement, and compromised accounts with threshold-based alerting.
- Mapped full attack to **14 MITRE ATT&CK techniques** across 7 tactics. Authored 45-page incident response report with timeline and remediation.

Tools: Splunk Enterprise, Linux CLI (Bash), Snort/Suricata IDS, Python (matplotlib) | **Frameworks:** MITRE ATT&CK, NIST SP 800-53, PCI DSS

SOC Alert Triage Simulation — CEO Phishing Attack

TryHackMe, 2026

[github.com/ojamadickson-creator/SOC-Analyst-Portfolio](#)

- Triaged 36 alerts in a simulated SOC, achieving **100% true positive detection** and 71% false positive dismissal rate.
- Investigated CEO spear-phishing attack, tracing full kill chain from email delivery through PowerView/PowerUp exploitation to data exfiltration via Robocopy.
- Applied Five Ws methodology, mapped to MITRE ATT&CK (T1059.001, T1566.001), delivered CRITICAL incident report with IOCs.

PROFESSIONAL EXPERIENCE

Customer Support Representative

Apr 2025 – May 2026

Teleperformance Portugal | Lisbon, Portugal

- Handled inbound email and chat support for global tech client, consistently meeting SLA targets and quality benchmarks in high-volume environment.
- Identified fraud and social engineering attempts during customer interactions; escalated security concerns to Engineering and Product Operations.
- Processed sensitive customer data under strict GDPR protocols.

Dedicated Dispatcher & Client Liaison

Jun 2022 – Jan 2025

Postal Box Logistics Inc | Aurora, CO (Remote)

- Managed client-carrier-driver communications while maintaining regulatory compliance. Built compliance training that reduced violations by 20% and improved efficiency by 23%.
- Maintained 98% on-time delivery rate through proactive tracking.

IT Support & Client Coordinator

May 2020 – Mar 2022

917Smith Inc | Springfield, OH (Remote)

- Troubleshoot hardware, software, connectivity issues. Delivered phishing awareness training, reducing security incidents.
- Resolved 95% of client disputes; improved retention by 25%.

Logistics Manager & Client Relations Lead

Sep 2017 – May 2020

Cranston Trucking | Granham, NC (Remote)

- Managed cross-functional teams and vendor relationships. Streamlined onboarding workflows, cutting onboarding time by 30%.

EDUCATION

B.Sc. in Cybersecurity

IU International University of Applied Sciences | Remote | Fifth Semester (Paused)

Network Security, Ethical Hacking, Cryptography, Risk Management, Incident Response, Secure Coding

LANGUAGES

English — Native / Fluent | Portuguese — Conversational (A2)
